## Professional Experience

---

**SDE Intern, Invact Metaversity** [🔗](#)

2022 – 2023

Bengaluru, India

**Admin Portal for LMS (web)** [🔗](#)

Next Js, Typescript, Formik, React Query, React Table, React Beautiful DND

- Created and continuously maintained Invact's internal **admin portal** from the ground up, to automate all the aspects of students onboarding in **Learning Management System (LMS)** i.e from creating parallel courses with multiple modules and sections to assign specific set of students to specific courses, from tracking their progress to sending them nudges incase they are lagging .

**Teacher Portal for Evaluation (web)** [🔗](#)

Next Js, Typescript, Formik, React Query, React Table, Chakra UI

- Collaborated closely with the evaluators to analyse their **pain points** during the evaluation process and with their valuable input, orchestrated a complete **revamp** of the **evaluation workflow** that **automates** the submission and evaluation of **POWs (proof of work)**, leading to a remarkable time-saving efficiency gain of over **2000 hours** for evaluators during each batch now.

**Invact's New Marketing Site (web)** [🔗](#)

Next Js, Typescript, Chakra UI, Framer Motion

- I had the privilege of being an integral member of the **Invact 2.0 brand reveal team**, where I embraced the challenge of crafting the brand new **marketing site** from its conceptualisation to its successful launch with improved **page load time and seo** in a remarkably short span of **2 weeks**.

## Projects

---

**Run React, Online code editor** [🔗](#)

- An online code editor built with **React** and **TypeScript**, that can fetch packages from **UNPKG** and bundle them together blazing fast in the browser itself using **ES Build**.

**Rave it, Social Media App** [🔗](#)

- A social media app built with **React, Redux Toolkit, Styled Components, MongoDB and Express Js**.

**Armor, Ecommerce App** [🔗](#)

- An e-commerce app built with **React, Vanilla CSS, MongoDB, and Express Js**.

**Rakesh.Website, My portfolio** [🔗](#)

- A clean minimalist portfolio built with **Next Js, Tailwind, Headless UI and Typescript**.
